Professional Summary

Python Developer with hands-on experience in Machine Learning, NLP, and AI automation projects. Skilled in Python, Pandas, NumPy, Scikit-learn, SQL, REST APIs, JSON, and FastAPI. Built AI solutions including Voice Bots, Resume Matching systems, and predictive ML models. Strong in data cleaning, preprocessing, model training, debugging, and problem-solving.

Experience

Associate Engineer — Rigved Technologies

Mar 2026 – Present

Client: Holcim Australia & New Zealand

- Managed IT operations and incidents from project onboarding stage.
- Monitored and resolved service requests using ServiceNow while ensuring SLA compliance.
- Performed incident response, escalation, and resolution for critical issues.
- Worked on SAP NetWeaver for backend operations and purchase order processing.
- Conducted root cause analysis (RCA) to reduce recurring issues.
- Maintained system availability and minimized downtime.

Internal Projects

- **AI Voice Bot** (Python, FastAPI, Speech Recognition): Built an AI voice bot to automate client call handling and improve response efficiency.
- **Resume Matcher (NLP)** (Python, NLP, Scikit-learn): Developed a system to parse, score, and rank resumes for efficient candidate screening.

Machine Learning Intern — HCL Tech (Remote)

Jul 2024 – Sep 2024

- Performed exploratory data analysis (EDA), data cleaning, preprocessing, and feature engineering.
- Built machine learning models for predictive analysis and model evaluation.

Projects

Email Spam Detection (Python, NLP, Scikit-learn)

- Developed an NLP-based classification model to detect spam emails.
- Applied text preprocessing and machine learning algorithms for accurate filtering.

Twitter Sentiment Analysis (Python, NLP, Pandas)

- Built a sentiment analysis system to classify opinions as positive, negative, or neutral.
- Used visualization techniques for extracting data insights.

Cement Strength Prediction (Python, Regression, Scikit-learn)

- Developed a regression model to predict cement strength based on composition.
- Improved model performance through feature optimization.

Technical Skills

- **Languages:** Python, SQL, C/C++
- **Libraries:** NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
- **Frameworks:** FastAPI, Flask (Basic), Django
- **AI/ML:** Machine Learning, NLP, Model Training, Model Evaluation, Data Cleaning, Data Preprocessing, Feature Engineering
- **Backend/API:** REST APIs, JSON, API Integration
- **Tools:** ServiceNow, SAP NetWeaver, GitHub, VS Code, Ozonetel
- **Databases:** MySQL
- **Learning:** TensorFlow (Basic)

Education

Bachelor of Technology (Computer Science)

2021 – 2025

ITS Engineering College, Greater Noida

Grade: First Class

Class 12 (Science)

2019 – 2021

D.K.V.C Jr College

Class 10

2019

Bharat English High School

Certificates

- Machine Learning Development – iNeuron
- Data Science Libraries – iNeuron
- C Programming – Incapp
